summary

I'm a **front-end developer** passionate about building clean, responsive, and user-friendly applications. My journey in web development started with creating intuitive interfaces using **CSS**, and **JavaScript**, and I've since been growing my skills with **React.js** to bring life.

Right now, I'm expanding into **back-end development** to become a **full-stack developer**. I'm exploring server-side technologies, databases, and APIs so I can build complete solutions from front to back.

I love solving problems, learning new tools, and turning ideas into functional digital experiences. My goal is to grow into a developer who can create projects that are both visually engaging and technically powerful.
